

Dr Seuss on Sex

Richard W Casey MD FRCS Urology, *Editor-in-Chief*

He took off his pants, and gave it a stare
And he said to himself, "This is going nowhere"
"It used to get hard, it just ain't fair"
"I'll check with my doctor, he gives a care"

For all the patients in ED land
In long lines they would have to stand
For there were no good pills
To cure their ED ills
For they would learn a new set of skills

"Help me, doc, my wife is still keen"
"It's all in your head, not the small one between
Concentrate on your partner, progress will be seen
Imagination is important, to be a good hub
Kind words, attention and a back rub"

This advice was quite useful till about one nine eight zero
Until there appeared in a Vegas Casino
An unusual character, not a drag Queeno
But a doctor of sorts, whose mind was quite quick
"Welcome everyone, I'm the Stick in the Dick"

Now The Stick in the Dick had the answer for all
No longer a soft penis, they all would stand tall
"For my potion restores to the organ its stiffness
Look at my hard penis, you're all the first witness"

For ten years there was joy back in old ED land
There wasn't a soft penis in anyone's hand
Stick in the Dick and his turgid conquest
Had not noticed that he had created a mess
Sure, dead penises he had brought back to life
Only to neglect one person, the penis's wife
"Too mechanical" they said, "it's like riding a bike"

"We need something more natural
and it is a factual
that actually
sex is just in our head"

"A pill would be better to make you slow down
And do something sexy while waiting around
A back rub and some hugging

Along with some tugging
and a little less bugging
that we should go down."

Finally a blue pill came on to the scene
And Stick in the Dick we started to wean
It was time to appreciate a simpler solution
Not having to titrate to another dilution
Viagra created a sexual revolution

Most men could now function when asked to perform
Whether 60 or 70 or at Shady Lawn
And to their doctor's offices they were drawn
Advertisements told them they could belong
'Good Morning, Good morning' was more than a song
There's money in drugs that can make members long

Now Thing 1 and Thing 2 have entered the race
Viagra they hope one day they'll replace
Thing 1 is called Quick Dick
For it works a bit quick
Thing 2 is La Weekend
Wishful thinking say most men

..... then there's this thing about partners again

"There must be a pill that can make my wife randy
So I don't need flowers, jewels and the candy
The Window of Opportunity I am afforded
Stays closed unless my wife is well courted
And who has the time once hockey has started?"

If old Dr Seuss had written about sex
Imagination, adventure and togetherness
His pictures and rhymes would surely express
ED land, a place that is magnificent
No vacuums, pills or things to inject
Of course, his characters aren't anatomically correct!

Anamaria, Carol, Monica, Nadine
Catherine, Isabella, and even Christine
Work hard for their products, to make MDs keen
'Read our statistics, for statistics don't lie'
'Ours is the best drug for your patients to try'
